

EMMA THATCHER

Barnhill Community High is a great school. The building is very modern. (top of the range I say) The facilities are good as they are new, clean and are a good use. The trips we have been on are Canterbury, Warwick Castle, London Zoo and 60 pupils went to Wales for an activity week. We have a gigantic hall, the science and Technology department opened in September 2000. It is such a big school that sometimes you get lost. The library is very big and all the books you could think of. In technology one class does D.T. and the other class does food. Every term we have an assembly. I wish some of us get merit awards. My favourite subject is art because I like drawing and painting.
